NEW

CZ P-09 NOCTURNE

Third generation of the successful polymer pistol series with the OMEGA SA/DA Trigger Mechanism

The new CZ P-09 NOCTURNE F (Full-size) and C (Compact) models not only retain all key features of the previous CZ P-07/09 generation, but in some ways takes them even further. It comes with improved ergonomics, the ability to mount a red dot sight without a plate, and controls that further expand the features found in the CZ P-09 series.

CZ P-09 F NOCTURNE

The full-size version of the CZ P-09 NOCTURNE with OMEGA SA/DA trigger mechanism features advanced ergonomics and intuitive placement of controls for maximum comfort with intuitive operation. High accuracy is ensured by its full-size, cold hammer forged barrel and luminescent or tritium sights. New texturing on the grip and other strategic areas provide high traction where you need it most.

CZ P-09 F NOCTURNE SR

The Suppressor-Ready (SR) version of the full-size comes with a 1/2" x 28 UNEF-3A threaded barrel for quick and easy mounting of a suppressor. High performance doesn't need to raise its voice.

Red dot sight is not included in the package.

CZ P-09 C NOCTURNE

The reduced, compact dimensions of the CZ P-09 NOCTURNE C make it the perfect choice for concealed carry. Although smaller than the full-size version, it retains the same cutting-edge features, intuitive operation and extreme shooting comfort.

CZ P-09 C NOCTURNE SR

Concealed carry with a whisper is a fitting description for the CZ P-09 C NOCTURNE SR (Suppressor-Ready). Its reduced dimensions are complimented by a 1/2" x 28 UNEF-3A threaded barrel for fast and convenient mounting of a suppressor.

What's new?

- New texture pattern for improved traction
- Additional textured areas on grip for an even more secure hold in hand
- New Optics-Ready interface compatible with Shield RMS and Holosun K footprints
- Contrast and luminescent three dot sight picture
- Enhanced front cocking serrations
- New slide stop design for easier control
- Improved ergonomics of ambidextrous decocker and manual safety

What has carried over from the CZ P-07 & P-09?

- Cold hammer forged barrel
- Omega SA/DA trigger mechanism
- Interchangeable, ambidextrous safety levers, manual safety to decocker
- Reliability with different types of ammunition
- Mechanically and thermally stable fiberglass-reinforced polymer frame
- MIL-STD-1913 rail for mounting accessories
- Three sizes of interchangeable backstraps to modify grip
