# EXTREMELY DURABLE

**The CZ BREN 3 is the third generation of the extremely popular CZ BREN select-fire rifle family, which is currently used by the Czech army, as well as by other armed forces around the globe that include the French anti-terrorist unit GIGN, the Mexican Federal Police, the Portuguese Air Force, and the Hungarian Armed Forces.**

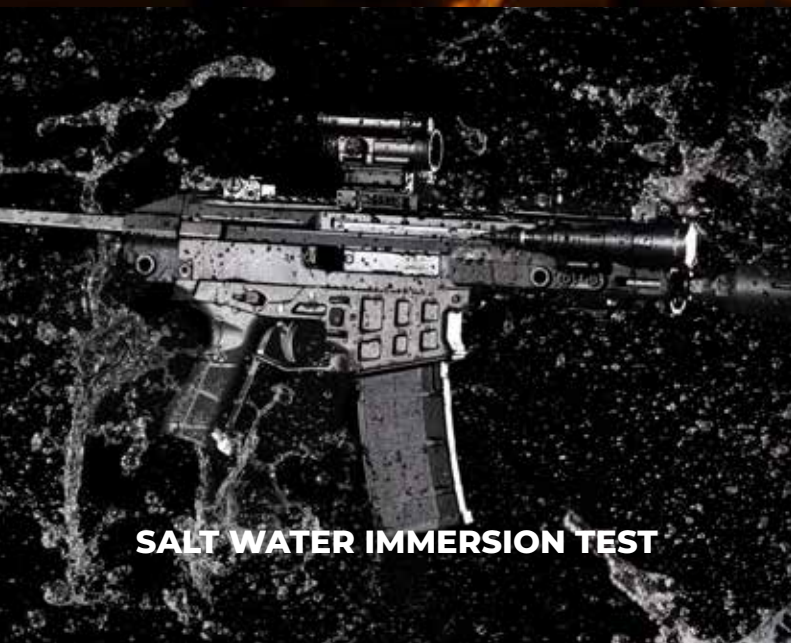

Designed for extreme durability, without sacrificing high accuracy, the modular, multi-caliber CZ BREN 3 has reached the pinnacle of class-leading reliability when faced with the most severe conditions encountered across the globe.

The CZ BREN 3 not only meets the demanding requirements of NATO AC/225 tests, but exceeds them, thereby ensuring high performance when you need it most. High temperatures, barrel obstructions, salt water, ice, cold, sand, mud, and contaminated air are no match for the CZ BREN 3.

No matter where you are, and what you face, you can count on the CZ BREN 3 to provide you with the highest reliability and performance that help ensure the success of your missions.

## CZ **BREN 3**

**The CZ BREN 3 comes in 5.56 × 45 NATO and 300 AAC Blackout calibers. High accuracy and double the service life is ensured by its chrome-lined hammer forged barrel. The extraction of combustion gases is adjustable with a 3-position selector knob, which improves the function of the rifle when using a suppressor or adapting to adverse conditions.**

Fully ambidextrous AR-Style controls include a 45-degree safety lever (safe, single shot, full-auto), magazine release, and bolt catch/release located on the left side of the receiver and also inside the trigger guard. You can choose from a fixed or folding charging handle on both sides of the receiver.

# GAS PISTON OPERATED

The standard version of the CZ BREN 3 comes with a folding, 4-position telescopic polymer stock, although a 4-position PDW stock is also available. Its extended forend features an M-LOK interface for mounting a wide range of accessories, such as sights, flashlights, laser markers, and more. A total of 7 QD sockets – 2 front and 5 rear – allows for a more personalized attachment of a rifle sling.

## AVAILABLE IN 5,56 × 45 NATO 300 AAC BLACKOUT
